

# Lightning Souls: Champion's Ashes

---

This datapack is a souls-like datapack and initially from the server LD minecraft server. The datapack need Minecraft version 1.19.4+.

The following resourcepack is needed for datapacks working properly: <https://github.com/Taffy-Nyaru/Lightning-Souls-Resourcepack>

## Features

- Every item is obtainable using command: `/loot give @s loot ldmc:`
- Added new structure Firelink Shrine spawn only in mountain biome.
- Added new structure Genshin Switch spawn only in the end.
- Added new entity types and Bosses.
- Added some ds3 pvp weapons.
- Added some new items with all different abilities.
- Compatible with Epic Fight mod.
- Completely Vanilla.

## Playing Suggestion

To play this datapack, first make a steel furnace to get steel ingots, the fundamental item of this datapack.

Then kill the wither to craft an energy crafter and obtaining more items, use the homeward bone to craft a map locating the structure "Firelink shrine". Then defeat every boss in the structure to obtain more items.

## Warns

- Don't move the modded blocks with pistons or any form of translations.
- Don't put the modded blocks on any incomplete blocks, except for the steel furnace on campfire.
- The datapack added a list of friendly creatures and the mobs in this list would never attack each other. It is revisable in `data/ldmc/tags/entity_types/friendly_creature.json`
- The datapack uses 1380000-140000 and 1440000-1450000.

## Item Descriptions

---

- A brief description about the function and usage for each item.
- The steel tools and armors recipes places exactly as how iron tools and armors places in vanilla crafting

- Steel ingots, nuggets and blocks does every single function in which how iron ingots/nuggets/blocks in vanilla does.

- Both the crafting table and energy crafter could craft items, but the energy crafter is automatic-crafting and only craft the recipes provided in the datapack.
